

# Accountant and entrepreneur lives life to the fullest with Sage One

Debrah runs her own accounting business near Vancouver, B.C. A true believer in “going big or going home,” she loves treating her customers like family as much as she loves spending quality time with her own family. With Sage One, Debrah has found that she can more seamlessly blend these two passions and live her life to the fullest.

## Easily balance work and play.

Debrah became certified in the Sage One Accountant Edition shortly after it came out. As a Sage One accountant, she’s seen the huge benefits it has brought to both herself and her customers. Not only has she been able to better help her customers take their businesses to the next level, but Debrah has found that by using Sage One, she can effortlessly balance her business and personal life. Now she can spend more time away from her office doing fun activities with her family without worrying about neglecting customers in need. With Sage One, she always has their data readily available on the go. If a customer needs her help, she can quickly access Sage One on her iPhone and answer her customers’ questions.

## Simplify business with the latest technology.

Debrah is embracing how much easier new technology can make managing her business, as well as her customers’ businesses. Sage One is cloud-based software, so with it she’s able to get real-time data for her clients and access all of their information in one place. This helps her stay up to date on how clients’ businesses are doing and more quickly offer advice on how to improve them. When Debrah’s new customers are hesitant about cloud-based accounting, she explains, “If you are doing online banking, you are already doing cloud accounting. And once you get involved in cloud accounting, you won’t go back.” For her, it’s all about finding the best ways to do what makes her happiest: be with her family, grow her business, and watch her customers succeed in their businesses.

## Challenge

Debrah is a go-getter who’s as passionate about helping her customers succeed as she is about bonding with her family. She needed a solution that would let her put her whole heart and soul into both her business and family life.

## Solution

Debrah became certified in the Sage One Accountant Edition shortly after it came out. Sage One allows her more flexibility since all Sage One client data is saved in one

location and can be accessed on the go from an iPhone or other personal mobile device.

## Results

Now Debrah has the freedom to spend an afternoon away from her office fishing with her family or playing her favorite sport—baseball. If she needs to help a customer while she’s out and about, she can easily pull up a Sage One client’s data with Sage One on her iPhone and answer a question.
